THERMOSTAT MALFUNCTION DETECTING SYSTEM
FOR ENGINE COOLING SYSTEM

REASONS FOR ALLOWANCE

The following is an Examiner's statement of reasons for allowance:

Claim 37 has been found to be allowable over the prior art because the prior art fails to teach or suggest a method for detecting a malfunction of an internal combustion engine thermostat comprising:

detecting an open-malfunction of the thermostat based on the calculated value of intake air and the second engine side coolant temperature, as defined by the claim, in case the first coolant temperature, as defined by the claim, is determined to be lower than the thermostat opening temperature,

in combination with the remaining limitations of said claim.

Claims 38 and 39 have been found to be allowable over the prior art due to said claims' dependency on claim 37.

CONCLUSION

Any comments considered necessary by the Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
